A small point: the BP proposal is for C and T, part of the reason I cautioned on a hard condition of equity support. Attached is the latest write up Reuven sent from BP with admonitions to hold close.

Subject: Fw: Climate meeting: Friday 10 a.m. invite

I see the Chair is engaging, in his own way ... and though he spells out who's invited, I know you're wondering who all should be there.

Do we know how or why he's connecting 100% to C/T? Am I correct in guessing that he's looking to counter the BP tax proposal with a C/T proposal? Why does his " framework of the possible " not include any of the other bills in our package ... in particular LCFS, which BP is certain to have a view on?

Open to other thoughts ... but if this discussion could be about solely delivering our message (real emissions reduction with real support, and the full Gov's package, as bottom lines) to the Chair(s) and BP, then I'm inclined to leave it at Drew and Chris. Partly, I don't think we're ready to give the BP idea the endorsement of our full attention.

However, if the discussion will be about which bills, and/or the terms of the bills, as the Chair's message suggests ... then I recommend all four of you attend. If we don't know, or don't think the Chair will keep it limited ... then I still suggest all four attend.

One of us would need to call the Chair, so he know who we want to bring. Drew -- you or I?

Other thoughts?

Drew

Sorry we didn't connect today. Talk tomorrow on this? You coming up? I had a convo with the Chair last night and he's made some requests that I would like to connect with you on before walking in Friday.

BTW – enviros briefed me quickly on post election 1631 polls today. One interesting thing --- most folks said no based on household costs impacts. The “unfair” coverage of the plan appears to be the next, though significantly less important, driver and the “unaccountable board” didn't actually register as a factor.

All of which plays in, perhaps, to the notion that someone can argue the legislature can “fix” what the electorate didn't like.....

Team:

I've spoken with you all individually about connecting for a serious, thoughtful dialogue about 'what's possible' on a few key climate strategies and bills.

Please accept my personal invitation to join a climate policy discussion at 10 a.m., Friday, Nov. 30 in downtown Seattle. The purpose of the meeting is to specifically outline latest thinking about: 1) 100% renewables and 2) cap & trade bill. I am not inviting other players at this point so that we can outline the framework of what might be possible. Please keep the meeting discrete at this point in order to make it as productive as possible at this stage.

Joe, please bring any appropriate staff. Denny, per our discussion, you are authorized and invited to bring direct representatives of both PSE and BP only. Any other 'must attend' names from anyone please check with me first.

Location: <https://www.pointb.com/about-us/locations/seattle>. 1420 5th Avenue (U.S. Bank Building, 5th Floor). Company name is Point B.

Please confirm.

Your partner in service,

Reuven.
